

Sistem culisant STAR-FLUID 28

cod articol: CSU.STAR-FLUID28

Star Fluid este un sistem de culisare pentru dulapuri cu uși suprapuse, definit printr-un design minimalist și un mecanism brevetat de închidere amortizată cu tehnologie Fluid. Acest sistem asigură o mișcare lină, silențioasă și controlată a ușii, eliminând riscul închiderilor bruște sau zgomotoase.

Sistemul **Star Fluid** de la Terno Scorrevoli este o soluție extrem de versatilă, concepută special pentru a fi integrată atât cu panouri din lemn, cât și cu rame din profilele de aluminiu din gama **FINE** (cu sticlă de 4 mm).

Ce înseamnă tehnologia Fluid?

Amortizorul fluid constă dintr-un cilindru ce conține un lichid siliconic vâscos, proiectat să absoarbă energia mișcării. În momentul în care ușa se apropie de capătul cursei, amortizorul este activat, încetinind controlat deplasarea și garantând o închidere lină și perfect silențioasă.

Avantaje:

- **Montaj rapid:** Amortizoarele se fixează manual, fără unelte, prin click (sistem patentat).
- **Mecanism ascuns:** O bandă de aluminiu maschează tot sistemul de glisare.
- **Culisare fină:** Tehnologia Fluid elimină șocurile și zgomotul la închidere și deschidere.
- **Șină universală:** Aceeași șină se folosește indiferent de tipul de prindere ales.
- **Versatilitate:** compatibil cu ramele FINE

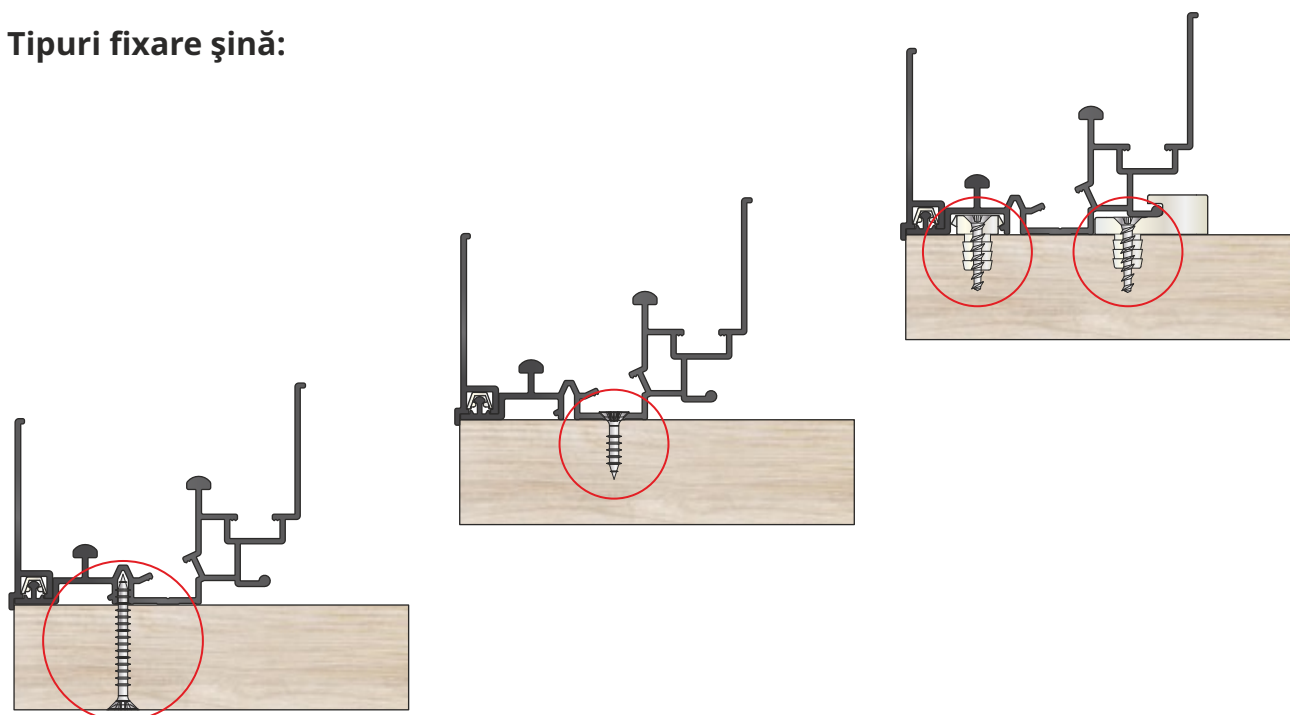

Caracteristici:

- Portanța maximă : 80 kg/ușă
- Grosime ușă: max 28 mm
- Tehnologie Fluid
- Configurație: pentru 2 sau 3 uși suprapuse.
- Lățime minimă ușă : 600 mm
- Reglare pe înălțime +/- 2 mm
- Șine culisare: 2000, 3000, 4000 mm
